

Familiarize Yourself with Software Quality - Answer Key – “Your Turn”

Part 2: Perform Functional Tests on a Website

Chapter 1: Review the Test Plan

Reminder of the instructions:

The test plan is an essential element in software testing. You will discover the two test plans that you will use to test the Jardin Actuel website in the upcoming “Your Turn” exercises:

- Website test plan (available in .xlsx or .ods format)
- Mini test campaign test plan (available in .xlsx or .ods format)

Review these two test plans and note the key points that stand out to you in a document.

Correction :

Datasets

Datasets for registration forms:

- **Field “Last Name”**
 - Regular name
 - Name with an accent
 - Name with special characters
 - Very long name
- **Field “Email”**
 - Email that follows the correct format
 - Email without a “.” in the domain name
 - Email without “@”
 - Email without both “.” and “@”
 - Very long email

Datasets for article creation:

- Plan for different image sizes
- Plan for different text sizes

Execution Time

Plan to repeat some tests in dark mode in addition to those already indicated in the test plan.

Prerequisites

- Ensure Docker is installed and working.
- Have access to GitHub to retrieve the website.
