### P1C2: Get Windows 11

Reminder of the instructions

You are starting an internship in the IT department of a major car manufacturer. Your manager wants to migrate the company's computers to the Windows 11 edition that offers the highest possible level of security. Before purchasing licenses, she wants to test the system without limitations to make sure it meets her needs.

Your manager asks you to select the Windows 11 edition that best matches her needs. On Microsoft's official website, download the ISO file for the edition you believe is the best fit.

Proposed answer

The edition that best fits your manager's needs is **Windows 11 Enterprise**. It is designed for organizations and includes advanced security and management features beyond Windows 11 Pro.

This edition is available as a full evaluation ISO file, without functional restrictions, from the Microsoft official website: [Windows 11 Enterprise | Microsoft Evaluation Center](#)
